## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to a method of cutting a band of paper.

Group II, claim(s) 3-9, drawn to a controlling device.

Group III, claim(s) 10-18, drawn to a cutting device having helical blades.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the cutting method in group I can be applied to a cutting device having a different gear system than the one in Group III, and use a different controlling device than the one in Group II to control the cutting blade. Since the method of Group I does not need the controlling device of Group II and the gear system of Group III to perform the cutting method, unity of the invention is lacking.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because

the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
